1.1.2 THE MOST IMPORTANT EVENTS IN 2015

1.1.3 FACTORS AND EVENTS AFFECTING THE ACHIEVED RESULTS OF THE GROUP CCC

MACROECONOMIC DEVELOPMENT IN CENTRAL AND EASTERN EUROPE:

The Group CCC S.A. operates mainly in the markets of Central and Eastern Europe with clear dominance of sales on the Polish market, which in 2015 recorded 78.8% share in profits. The result locations of Group's stores in the above area is the significant impact of the condition of the economies of Central and Eastern Europe on the sale of the Group's products. The main factors that had an impact in the presented reporting period on the financial results were:

- Increase in employment,
- Growth of GDP,
- Increase in net income / disposable income,
- Increase in the level of trust among customers,
- Increase in propensity to consume.

For a long time Poland is recording the economic growth. In the first quarter of 2016, GDP growth amounted to 3.6%. A similar result was recorded in 2015. Respectively for the years 2014 and 2013 economic growth in Poland amounted to 3.3% and 1.6% (compared to the average GDP growth for the countries of the European Union - 1.1% and 0.2% respectively for the years 2014 and 2013, according to World Bank data).

Important macroeconomic factors that affected the Group's results due to the specific activity was consumer behaviour, in particular the propensity to consume. Economic growth of European Union countries favoured the development of trade - customers were willing to spend large amounts of money on consumer goods.

CHANGES IN CONSUMER PREFERENCES AND CHANGES IN DEMAND

Technological advancement, constantly evolving trends or changes in mode of life significantly influenced the changes in needs and behaviour of customers in the reporting period. Also their preferences changed, including those concerning the form of purchases and therefore CCC Group expanded its operations and enabled customers online shopping (purchase of the online store eobuwie.pl).

SEASONALITY AND WEATHER

A significant impact on the proportion of sales during the financial year had the weather conditions and seasonality (peak demand in spring and autumn). The disorder of weather conditions may result in postponement of customer purchasing decisions or shortening of the season of the highest sales. 2015 was the warmest year in the history of meteorological measurements, which effectively discouraged Consumers to make purchases of autumn-winter collection.

Development of the company, the increase in demand for its products and increasing performance requirements of distribution contributed to the realization of the largest in the history of the Group's investment - the building of the Logistics Centre, located in the Legnica Special Economic Zone (SEZ) in Polkowice. Logistic Centre is a modern complex of large-format objects.

It is the largest of its kind in Central Europe. Investment in 40% was financed with EU funds through the program of Innovative Economy.

New Distribution Centre, in conjunction with the existing sorting plant is able to handle more than 100,000 cartons (approx. 1.1 million pairs of shoes) during two working shifts. The process of mechanization provides handling for future development and is essential to the further development of logistics processes. In addition, it allows for the optimization of storage space, which is currently 82.3 thousand m².

CCC intends to become the footwear market leader in the Czech Republic, Slovakia and Hungary, and establish its unquestionable position as leader in Poland. In addition to the CEE countries, CCC in 2015 will actively develop its sales network in Slovenia, Croatia, Romania and Bulgaria. The expansion in Austria and Germany will be also implemented. Continuation of the dynamic expansion will result in increasing in the years 2013 – 2015 total floor space by 80%.

BECOMING A LEADER IN THE FOOTWEAR INDUSTRY IN CENTRAL EUROPE

The first element of the Group's strategy was to gain the leading position in each of the markets in Central Europe in which it carries out its operations.

Number of store
in the period 2013–2015

Number of stores in CEE countries
in the period 2013–2015

At the end of December 2015 CCC Group is the largest footwear company in the CEE region – the Group realized a goal through sustained efforts within increasing the floor space and keeping the high profitability.

DOUBLING THE FLOOR SPACE

During the implementation of the strategy one of the main operational objectives of the Group was to increase floor space by 100%, i.e. more than 150 thousand m² in the period from June 2012 to December 2015.

The achieved results far exceeded the assumed objective – the area increased by approx. 123%, which is over 205 thousand m². The Group realized this objective by continuing activities of the following areas

CONTINUATION OF FOREIGN EXPANSION

CCC Group focused its efforts on enlarging floor space in Poland, the Czech Republic, Slovakia, Hungary, Romania, Austria, Slovenia, Croatia, Germany and Turkey. In the period 2013-2015, the Group increased its net floor space of around 196,600 m². In 2015, the estimated increase in net floor space CCC amounted to 71.4 thousand m². In 2014, the net increase amounted to 71.1 thousand m² whereas in 2013, 54.1 thousand m². In 2015, the Group issued on investments in new retail stores approx. 122.8 million PLN.

DEVELOPMENT OF DOMESTIC SALES NETWORK

Development of the network, especially own company stores by opening facilities in new, attractive locations, carefully selected in terms of profitability and return ratio and by expanding the network in regions where it is less present. Gradual enlarging of own existing stores the size of which will exceed even 500 square metres will also be the part of the development.

**MAINTAINING HIGH PROFITABILITY
AND DOUBLING REVENUE**

Another objective, which the Group set itself for the period 2013-2015, was to maintain a high return on equity and doubling revenues.

Revenue for the period 2012-2015 increased from 1.3 billion PLN to 2.3 billion PLN. The Group managed to achieve objective in 88%, the main reason was, among others, lower than expected sales in the fourth quarter of 2015 due to warm winter and low demand for autumn-winter collection.

The strategy set out a long-term operating margin at the level of 15-16% and net profitability at the level of 10-13%, whereas return on equity of not less than 20%. Despite intensive expansion in 2013-2015 the operating margin amounted to respectively: 10.2%, 12.1%, 11.1%, net profitability in 2013-2015 was at the level: 7.6%, 20.9%, 11.3% whereas return on equity in 2013-2015 was: 21.2%, 44.1%, 23.1%.

Increasing the scale of activity and at the same time maintaining high efficiency and operating efficiency aims at increasing the value for shareholders of the Group CCC.

STRATEGY FOR 2016 – 2017

The strategy chosen by the Group for the years 2013-2015 will be continued in the years 2016-2017, and the basic axis of growth are the countries of Central and South-Eastern Europe and the Baltic countries. In addition, CCC Group aims at becoming a leader in online sales of footwear in Central European markets over the next three years.

The strategy for the years 2016 and 2017 was defined on the basis of the three strategic objectives.

STRATEGIC OBJECTIVES FOR THE YEARS 2016-2017 ARE:

- continuation of the very successful expansion into the markets of Central and Eastern Europe and winning a leading position in each national market of footwear in the region;
- achieving over the next two years, i.e. by the end of 2017, sustained profitability in the markets of Austria and Germany;
- utilization of synergies within the Group CCC and winning by eobuwie.pl leading position in online sales of footwear in Central Europe.

STRATEGY OF THE GROUP CCC – EXECUTION AND DEVELOPMENT PLANS

[in mln PLN unless otherwise stated]

CONTINUATION OF EXPANSION

First of all, CCC Group will continue its highly successful expansion in the years 2013-2015 in the markets of Central and Eastern Europe and hopes to win a leading position in each national market of footwear in the region. As a part of this objective the Group in 2016 expects to open a new distribution company in Serbia and the launch of the sale of a franchise in Estonia.

The Group also plans to continue the expansion of its own sales network, thereby strengthening its position in markets where it is already present. Only in 2016 the Group plans to carry out investments in fixed assets with a value exceeding 140 million PLN and intends to increase its stores area of not less than 100,000 net m² (approx. 27% increase), of which:

- approx. 77,000 m² net (110 stores) will be opened outside Poland;
- approx. 23,000 m² net (40 stores) will be opened in the country.

The biggest growth of space Group CCC will record in Poland, Germany, Austria and Romania. All other countries will also have a proportional, high share in the growth of space.

Until the end of 2017 Group CCC intends to enlarge the sales space by 199.2 thousand m², which will lead the Group at the end of 2017 to managing the sales network, with a total area of 560.5 thousand m² and thus having CCC stores in 14 countries in Central Europe and Western Europe.

STRENGTHENING OF THE POSITION IN THE MARKETS OF AUSTRIA AND GERMANY

Another strategic goal is to achieve over the next two years a sustained profitability in the markets of Austria and Germany. The experience gained over two full years of expansion shows that achieving this profitability is possible, but it takes much longer than in the markets of Central Europe. Expected in 2016 the increase of sales „like for like”

in Germany and Austria is respectively 15% and 10%. In Germany and Austria, the Group as of 31 December 2015 owned a total of 78 stores with a total space of 49.6 thousand m². Until the end of 2017 it is planned to increase the area of 53.9 thousand m².

ONLINE SALE

The strategic objective in the area of e-commerce is the use of synergies within the Group CCC and winning by eobuwie.pl a leading position in online sales of footwear in Central Europe. Currently eobuwie.pl sells footwear through its

regional domains in Poland, the Czech Republic, Slovakia, Germany, Romania and Hungary. In 2016 selling will be launched in Bulgaria, Lithuania and Ukraine.

DEBT RATIOS

The Management Board of the Group CCC analyzing the level of debt uses the general debt ratio and debt ratio EBITDA. The following is a description of the two ratios.

General debt ratio is calculated as the ratio of net debt to total capital employed. Net debt is calculated as total borrowings (including current and non-current loans and issued bonds indicated in the consolidated statement of financial position) less cash and cash equivalents. Total capital employed is calculated as equity shown in the consolidated statement of financial position with net debt. The following is a calculation of the debt ratio:

	2015	2014
Net debt		
Loan liabilities	508,8	368,0
(+) Bonds liabilities	210,0	210,0
= Debt liabilities	718,8	578,0
(-) Cash and cash equivalents	340,6	161,9
= Net debt	378,2	416,1
Debt ratio		
Total equity	1 123,6	952,2
(+) Net debt	378,2	416,1
= Capital employed	1 501,8	1 368,3
The debt ratio (net debt / capital employed)	25%	30%

The debt ratio increased compared with the end of the previous year by 5 p.p., primarily due to the increase in cash (178.7 million PLN).

Debt ratio EBITDA is calculated as the ratio of net debt and EBITDA measure.

EBITDA is used by the Management Board CCC with analysis of debt as a result of covenants imposed by bank.

ANALYSIS OF FINANCIAL RESULTS OF THE GROUP CCC

(+) Bonds liabilities	210,0	210,0
= Debt liabilities	718,8	578,0
(-) Cash and cash equivalents	340,6	161,9
= Net debt	378,2	416,1
EBITDA		
Net profit	259,4	420,4
(+) Income tax	26,4	195,3
Profit before tax	233,0	225,1

ANALYSIS OF FINANCIAL RESULTS OF THE GROUP CCC

[in mln PLN unless otherwise stated]

CURRENT LIQUIDITY RATIO

This ratio is calculated as the quotient of current assets and the value of liabilities and current provisions. The following is a calculation of the ratio:

	2015	2014
Inventories	680,5	741,3
(+) Receivables from customers and other receivables	130,6	78,5
(+) Cash and cash equivalents	340,6	161,9
= Current assets	1151,7	981,7
Current debt liabilities	422,8	362,0
(+) Liabilities to suppliers and other liabilities	183,9	213,1
(+) Provisions	6,7	10,0
= Current liabilities	613,4	585,1
Current liquidity ratio (current assets / current liabilities)	1,88	1,68

The current liquidity ratio of CCC since the end of 2014 till the end of 2015 increased from 1.68 to 1.88, mainly due to a larger increase in the value of current assets (an increase by 17.3%) in respect of the value of current liabilities (an increase by 4.8 %), which the main reason was an increase in the value of cash (110.4%).

The Management Board of CCC S.A. highly assesses the compliance of the Capital Group CCC S.A. with its liabilities contracted. The Management Board believes that the level of realized cash flows and financial results achieved will enable to maintain liquidity ratios at a level enabling proper functioning of the Group. APPLIED SET OF CORPORATE GOVERNANCE PRINCIPLES

6.1.1

STATEMENT OF THE MANAGEMENT BOARD ON APPLYING CORPORATE GOVERNANCE PRINCIPLES

In 2015, CCC S.A. was subject to the corporate governance principles contained in the document „Good practices of companies listed on the Stock Exchange” (hereinafter: Good Practices) adopted by the resolution No. 19/1307/2012 of the Stock Exchange Council as of 21 November 2012 and in force until 31 December 2015. From 1 January 2016 new principles apply introduced by the Resolution No. 26/1413/2015 of the Supervisory Board of the Stock Exchange in Warsaw (WSE) as of 13 October 2015, „Best practices of WSE Listed Companies 2016” (hereinafter: Good Practices 2016) .

Document is available in the website of WSE:
www.corp-gov.gpw.pl

6.1.2

INFORMATION ON THE WITHDRAWAL FROM THE APPLICATION OF THE PRINCIPLES OF CORPORATE GOVERNANCE

In 2015, the company applied Good Practices excluding:

1. the principles contained in paragraph 12 contained in Chapter I „Recommendations for Best Practice for Listed Companies”, on providing shareholders with the possibility to perform in person or by proxy to voting rights during the general meeting, outside place of executing the general meeting, by means of electronic communication,
2. the principles contained in paragraph 10 contained in Chapter IV „Good practices applied by the shareholders” on providing shareholders with the possibility to participate in the General Meeting using electronic communication, which means:
 - a. broadcasting of general meeting in real time,
 - b. two-way communication in real time within which shareholders may speak during the course of the general meeting being in a place other than the place of the meeting.

Explanation: The Company, taking into account the need to perform multiple technical-organizational tasks and associated risk of technical and legal nature which may affect the orderly and uninterrupted agenda of the general meeting of shareholders, and thus their rights, decided not to broadcast the general meeting in real time and provide shareholders with the possibility to participate in the general meeting by means of electronic communication. As the dissemination of the use of this technical solution and ensuring adequate security of this application, the Issuer's Management Board is considering putting it into effect.

CCC SA complies with the recommendations and principles contained in the Best Practices 2016 except for the rules VI.Z.2. indicating the minimum 2-year period between granting options under the incentive program or other instruments linked to shares of the company and the possibility of their implementation. Failure of this principle arises from the fact that in the Company's incentive program, which was adopted prior to the entry into force of document the „Best Practices of WSE Listed Companies 2016”, are used tools which are characterized by the fact that the period between their the granting and execution is less than 2 years .

The full statement of CCC concerning the application of the Good Practices 2016 (DPSN) is available on the website of the Company, in the section on corporate governance: <http://firma.ccc.eu/>.

At the same time in case of chain development, contrary to the demand, the Group may incur costs higher than necessary.</p>	<p>In order to minimize the risks associated with the strengthening of own sales chain, the Group introduced the following solutions:</p> <ul style="list-style-type: none"> • monitoring the activities of competitors, • monitoring the situation in the industry, • monitoring of the macroeconomic situation, • creating a detailed plan and a dedicated team responsible for the implementation of the objectives connected to the development of own sales chain.
Activities aimed at increasing brand recognition and value of the brand	<p>Increase of brand recognition and its value can contribute to the increase in keeping regular customers, as well as to increased growth in new customers. The result will lead to an increase in market share and revenue. In case of fall in brand recognition and its value the outflow of customers may occur and a drop in market share and ultimately a drop in revenue.</p>	<p>Group in order to ensure further increase in brand recognition and value of the brand has undertaken the following actions:</p> <ul style="list-style-type: none"> • the introduction of appropriate instruments and advertising - promotion media, • the introduction of interesting interior of stores • presence of stores in prestigious locations.

EXTERNAL RISKS

RISK AREA	DESCRIPTION OF RISK	ACTIONS TAKEN

Hence exchange rates of CZK, HUF, HRK, USD and EUR (practically all import is denominated in USD and EUR, and a large percentage of the cost of renting space in EUR) will affect the structure of revenues and expenses. The main supply market for the Group CCC S. A. is the Chinese market, and consequently, the exchange rate of the Chinese RMB against the major world currencies can also have a significant impact on the costs of the Group. The appreciation of the RMB may worsen the conditions of imports, and thus result in increased costs to consumers.	The Group has undertaken the following measures to reduce the impact of exchange rate risk: <ul style="list-style-type: none"> • continuous monitoring of significant, for the Group, changes in exchange rates, • introduction of natural hedging strategy.
The risk of changes in interest rates	The Capital Group CCC S.A. is exposed to the risk of changes in interest rates, in connection with the loan agreements. The Group has undertaken the following measures to reduce the impact of risk of the overall economic situation: <ul style="list-style-type: none"> • diversification in terms of countries where the Group operates (decrease of economic situation correlation between countries) • monitoring the economic situation in the world and in the countries important for the Group, as well as suitable adjustment to the Group's strategy, • monitoring of important economic indicators in selected countries (unemployment rate, GDP per capita, CPI).
Seasonality of sales and weather conditions	Sales and inventory value depends on the seasonality of demand (peak of demand is in spring and autumn). The disorder of weather conditions may result in putting away customer purchase decisions or shortening the season of the highest sales.	Element in reducing the sensitivity of the Capital Group CCC S. A. to seasonal factors and weather is having its own manufacturing capacity. The Group is able to rapidly adjust production and deliver goods to shops line with expectations and current weather conditions.
